

Geraldine is overwhelmed by the amount of paper orders she receives from students at the Chick-fil-a. Some of the papers get lost and some of them get mixed up.

Orders:

1.	Mikayla B.	M-Sandwich – no pickles	<input checked="" type="checkbox"/>
2.	Ben T.	M-12ct nug	<input type="checkbox"/>
3.	Alex R.	M-SSandwich	<input type="checkbox"/>
4.	Pamela O.	Oreo ms, M	<input type="checkbox"/>
5.	Ricky L.	Fry, L – add ketchup	<input type="checkbox"/>

Geraldine's chick-fil-a acquires a new software that allows orders to be viewed and marked off digitally.

Orders:

1.	Mikayla B.	M-Sandwich – no pickles	<input checked="" type="checkbox"/>
2.	Ben T.	M-12ct nug	<input checked="" type="checkbox"/>
3.	Alex R.	M-SSandwich	<input checked="" type="checkbox"/>
4.	Pamela O.	Oreo ms, M	<input type="checkbox"/>
5.	Ricky L.	Fry, L – add ketchup	<input type="checkbox"/>

[See more](#)

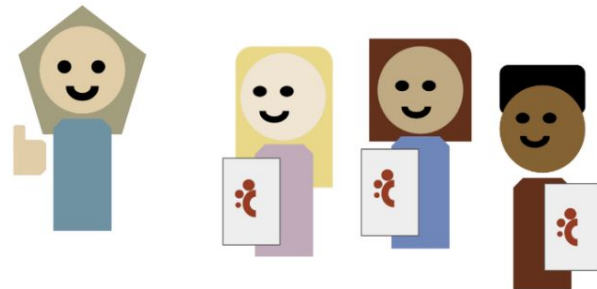

Every order pops up chronologically. There are employees who mark off when orders are started and when they are handed off. Geraldine's job is to mark them off as they are completed.

Orders:

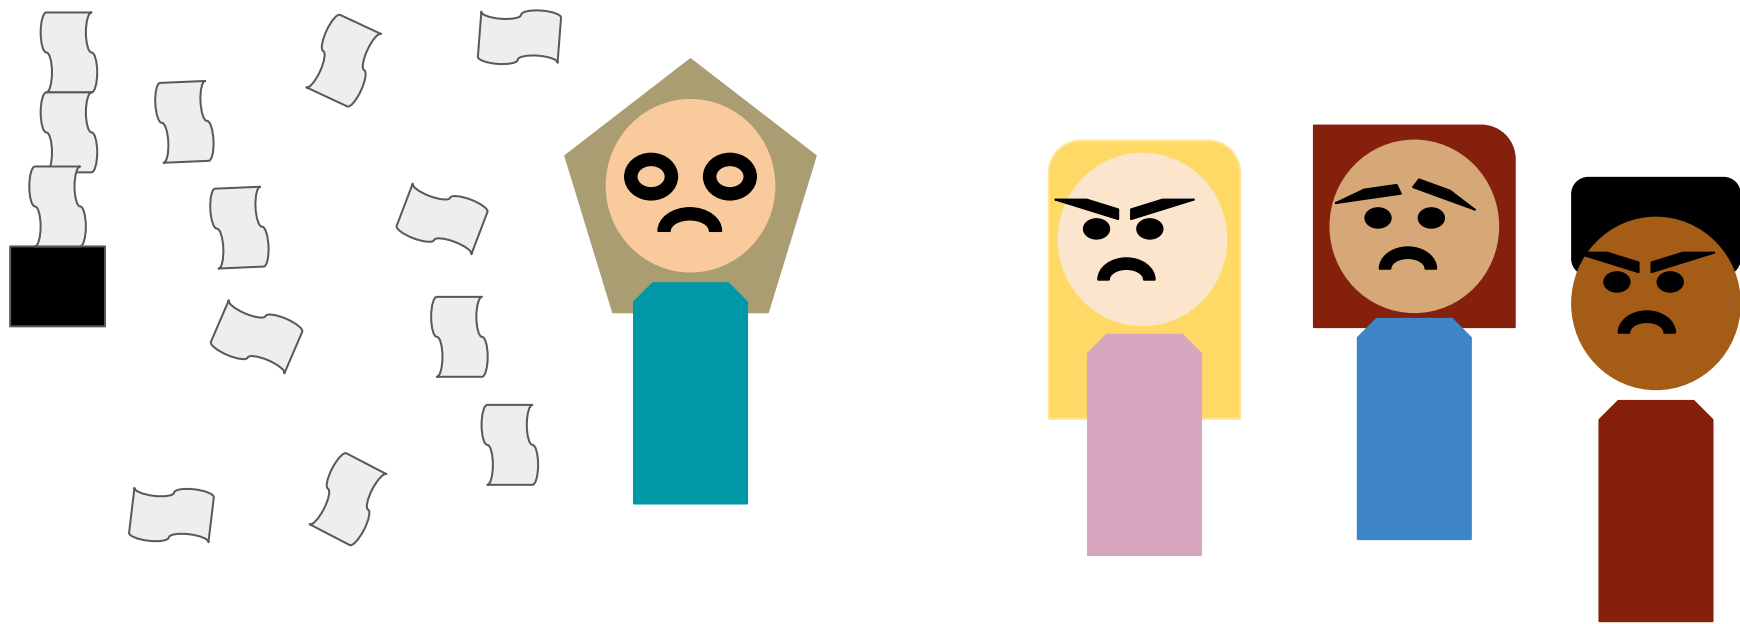

1.	Mikayla B.	M-Sandwich – no pickles	<input checked="" type="checkbox"/>
2.	Ben T.	M-12ct nug	<input checked="" type="checkbox"/>

Geraldine can now easily keep track of every order and be assured that every student is getting their food in as little time as possible.

Rick Foster is a manager for a local Wendy's. He is currently thinking about the reason for the decreasing amount of customers visiting his business. He reviewed his employees performance for the last few weeks, and they have been working diligently for those weeks.

Rick ordered his employees to have a meeting at his Wendy's. Once they arrived at the Wendy's, he informed his employees about the restaurant receiving poor sales due to losing meal swipe tickets. He told his employees that they are going to use a meal swipe app to keep record of the number of meal swipe orders, so it ensures customers receive their meal. One of his employees suggested that Rick rewards them after reaching a certain amount of meal ticket sales.

Rick decided to ask his internet-savvy friend Rachel to ask if she saw poor reviews about his Wendy's over the internet. Rachel shared with Rick the reason for his poor sales which is his customers complaining about losing their meal because meal swipe tickets are sometimes not being put to a customer's bag. She suggested using a meal swipe app to keep account of transactions using meal swipes.

After using this meal swipe app for a few weeks, sales from Rick's Wendy's returned to their usual amount. Rick is able to continue to manage his wendy's franchise without fear of bankruptcy.

## Justin (Student)

1 Justin is getting hungry and wants to order food.

2 He orders food on the app and his order is currently being tracked. He goes back to work.

3 After a while, he gets notified that his food's ready

~~He goes and picks up his food~~

4 He picks up his food

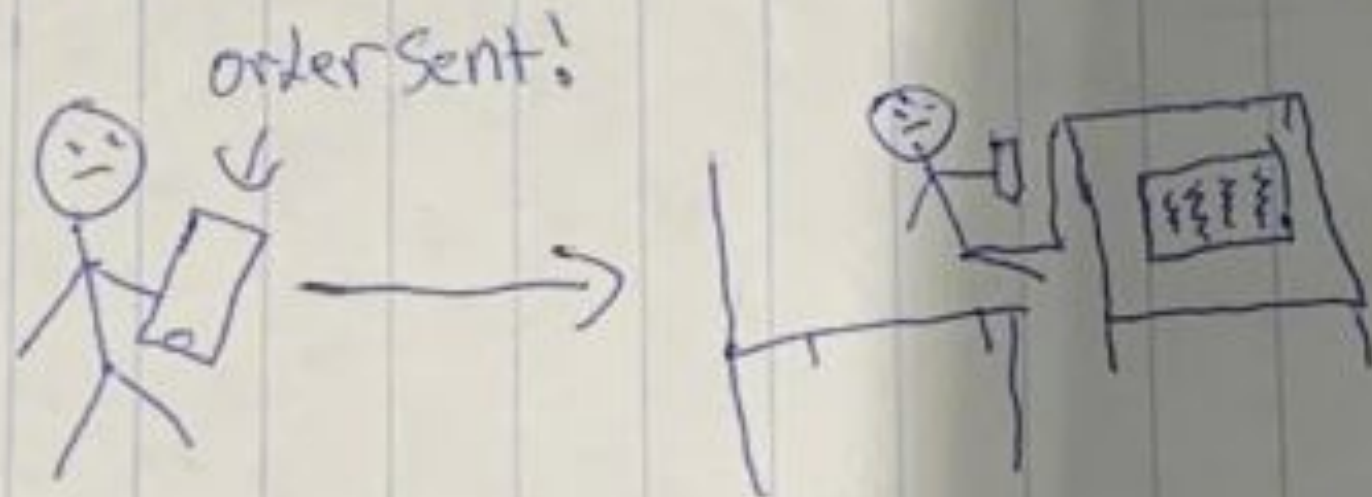

Justin ~~is~~ is getting hungry and wants to order food.

2

He orders food on the app and his order is currently being tracked. He goes back to work.

3

After a while, he gets notified that his food's ready

9 He picks up his food

Student has trouble  
with the app

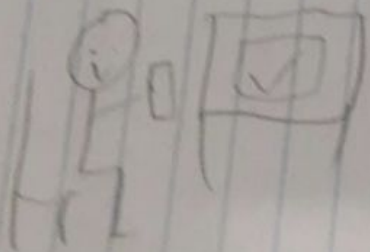

Student calls admin to  
help solve the problem

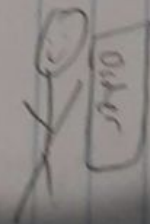

Admin listens and  
helps the student with  
the problem.

Admin fixes the problem

Student can now order  
with the app
